Bullard®

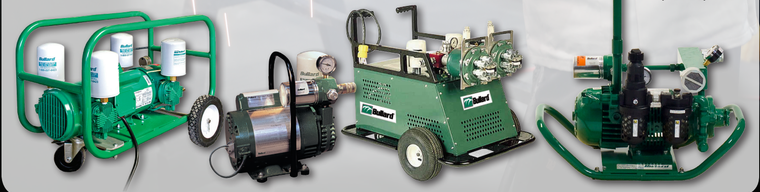
Versatility with Free-Air® pumps

Easy to operate and maintain, our Free-Air pumps offer a low-cost way to supply clean, breathable air to workers in contaminated environments.

ICE Pump

Electric Driven
(EDP10 and EDP50)

Air Driven
(ADP20)



Bullard®

Compressed Air

Bullard provides several options for monitoring CO and improving air quality in the workplace. Our line of Clean Air Boxes (CABs), CO Monitors, and 41 Filters help you stay safe and compliant while on the job.

Bullard. Proudly Made in the USA.

HMX Fabrication System

Head, Face, and Respiratory Protection All-In-One…
HMX is the Total Solution for your Fabrication Needs.

HMX Fabrication System

Made in the USA

All-in-one protection

HMX features all-in-one protection for your head, face, and respiratory system. Welders and Grinders feel assured knowing their head is protected, and their viewing area is enlarged for optimal vision. The HMX outer viewing lens is available in clear or shades 5 and 10. The airflow in the HMX is designed to rush over and around the top of the head to deliver maximum cooling to the face while also providing superior respiratory protection.

Choices for the way you work

Full bib capes attach within seconds to the HMX Helmet and offer two materials that gives grinders and welders options to choose from.
A lightweight, cooler fire-retardant (FR) cape or a superior, heavy-duty fire-retardant shroud for maximum protection.

Versatility defines the HMX

Stay comfortable

Our flow control devices provide workers with superior comfort and durability. Stay cool or keep warm, whatever climate you choose, we have a flow control solution for you. In addition, Bullard offers unique options in cooling. Our Frigitron is designed specifically to work with free-air pumps, while our Dual Cool provides cooling to the workers helmet and torso offering head to waist cooling.

Feel the flow

The EVA Series of Powered Air-Purifying Respirators offer the highest tested airflow in the industry for cooling comfort. EVA delivers a safe, comfortable, and productive experience for workers, while the EVAHL offers users all the same features for use in hazardous locations.

Sizes to fit all

Comfort is key in all our products, which is why our breathing tubes are available in two sizes to accommodate the different height requirements workers need.
